## A NEEDED LAW.

The fact that spies are detected almost every year, inspecting American forts and making plans of them, shows the necessity for a law which will make the offense criminal and tend to prevent the enterprise of foreigners in this direction. Senator Clark of Wyoming has introduced a bill to Congress which provides for a fine of \$500 or imprisonment for six months, or both, at the discretion of the court, to be imposed upon any person found upon any military or naval reservation, army post, fort, arsenal, navy yard, or naval station for any purpose prohibited by law or military or naval regulations. In other words, the United States Congress is called upon, for the first time in its history, to provide punishment for spies in time of peace.

It will be called to mind that not long ago Japanese spies were discovered making plans of American military works and the fact that there was no law under which they could be dealt with severely in times of peace. These spies from all military nations are common and the movement to have a law enacted to fit such cases is right.

Since the war with Spain, and especially during the last growth of the United States navy, military and naval authorities have been agreed as to the necessity of a law for protection against spies. It is always hard, and usually impossible, to prove that a suspect is a spy. If he were not a person of extraordinary cunning he would not be engaged in such a business. Senator Clark's act in France in a way to cover the case of a suspect.

This bill is made to apply to an American as well as to a foreigner, and there appears to be no objection to its becoming a law. It seems to be the only way to prevent a practice which, seriously contemplated, is recognized as a peril.

## OUR CANADIAN TRADE.

Since Canada is a good patron of Uncle Sam's, we could not afford to have a tariff war with her. Council Frank Deedman, of Connecticut, sends to the secretary of state the following official figures of imports from the states to the Dominion:  
"Exclusive of fresh meat, grains, and fresh vegetables, Canada imported in the fiscal year 1909 provisions generally sold by grocers to the value of \$23,739,935. Of this total there came from the United States \$7,416,525 worth, and from Great Britain \$4,846,750. By eliminating coffee, tea, and sugar, raw and refined, which are items amounting to \$18,500,000, it appears that of the other articles aggregating \$12,339,935, the United States sent over one-half, or \$6,550,025 worth."

"The imports of dairy products, eggs and meats, dried, salted and smoked, were as follows: Butter, \$259,428; cheese, \$120,075; eggs, \$241,005; lard, \$122,653; codfish and animal products of all kinds, \$245,342; hams, shoulders and sides, \$745,849; beef, salted in barrels, \$123,094; canned meats, poultry and game, \$3,707; extracts of meats, not dried, and soups of all kinds, \$68,725; pork, salted in barrels, \$891,384; dried or smoked meats and meats preserved in any other way than salted or pickled, \$51,811; other meats, \$18,000. Total, \$1,818,385."  
There is a good market in the province of King Edward Island for canned fruits and vegetables, smoked and salted meats, crackers, biscuits, and breakfast foods.

"The imports of sugar, confections, and sirups by Canada have grown from \$8,452,362 in 1896 to \$5,005,005 in 1909 and to \$12,935,537 in the last fiscal year. Since 1896 the imports from the United States have declined being \$857,262 in 1909, \$1,703,587 in 1908, and \$1,703,587 in 1907. The cheap and medium priced candies handled by the trade are of Canadian make."

This is good reading, and with good management there is going to be a greater amount of business done with Canada. The Americans who go into the northwest all want American goods.

## TESTING A TAX LAW.

The people of Vermont are intensely interested in the case of the Clement National bank, which is expected to pay the tax of seven-tenths of one per cent. on all deposits to the state upon the plea that it is unconstitutional and the supreme court has to decide in its favor or against it. This law exempts from taxation deposits in national banks, while it taxes the deposits of the savings banks. The bank making the deposit is the one on which the law should be with money deposits equally in whatever bank they may be deposited. The decision of the court will determine the matter for all the banks in the state. This is a matter in which there must be more or less interest in other states. The money question is as world wide as it is local and has a bearing everywhere.

## AN EXPERT OPINION.

Barney Oldfield, at 32, is the champion automobilist of the world, and must be recognized as an expert in his opinion of the business and its dangers. Talking about racing, he says:  
"When I finish a race for about four minutes I'm all a tremble like a gelatine pudding. If the sun were to strike me suddenly I feel as though I might melt and puddle up on the floor of the car. Then I relax, sit still and get my grip, wait for my ears to stop ringing and my eyes to stop watering—then get out and am myself again."

Then he said further to the representative of the Denver Post:

"Like the prize fighter, the motorcar race driver must live the simple life if he wishes to succeed."  
"There would be few accidents—or an extraordinary character, if car drivers would cut out the booze. Whiskey and driving don't mix, or if they do the mix is all to the bad for the driver."  
"When one drives one's nerves are kept to the highest tension and one's head must be clear as crystal. Eye and brain must be unimpeded for the wheel and road and the wise driver

# Woman in Life and in the Kitchen

## CONCERNING WOMEN.

There are said to be two women in New England receiving salaries of \$20,000 a year. They are the chief designers of women's dresses for consens making a specialty of handsome ready-made garments.

At the annual meeting of the Buffalo federation of women's clubs the organization recommended to the board of education of that city the establishment of an open air school in one of the city playgrounds.

Nothing more quickly marks the refinement of the young girl than the care she takes of the toilet articles, especially her comb and brush. If these are kept scrupulously clean by frequent washing it is the hallmark of neatness.

In Boston the latest innovation is a matrimony school where young women are taught how to make good wives. The best families of the Back Bay section have sent their daughters to the school, where they don simple white uniforms and are taught to keep their husbands, when they get into a bad temper, from leaving home. Household economy, music, literature, child study, hygiene and various other subjects are taught, and when the pupil knows enough to get a diploma she is good enough to get a husband.

## SUGGESTIONS FOR HOUSEWIFE.

Gritty soaps must never be used for washing paints.

Rub mirrors with methylated spirits and polish with a touch of blue powder.

One tablespoonful of ammonia to a quart of water will clean gold or silver jewelry.

Ordinary wall papers may be cleaned with dough, or rubbed with a soft, clean flannel dipped in fine oil.

When beating upholstered furniture in the house, place a damp cloth over the pieces. The dust adheres to the cloth, and does not rise to the room.

The soiled lace yoke of a dress need not generally be removed to be cleaned. Plan which usually restores its pristine freshness is to rub powdered starch into the lace, let it lie some hours, and then brush it out. The starch absorbs both grease and dirt.

Most every housekeeper knows what a job it is to clean a grate after grating coconuts, lemons, or, in fact, everything she grates. If she will have handy a small scrubbing brush or scrub, as they are called, and scrub with this every particle will come out. The brush will leave the grate sweet and clean.

Have you ever used black magnesia to clean silver? The flour-like substance is not gritty and it can be used dry to rub up pieces of silver that are not so badly tarnished. Apply with soft cotton cloth and rub to a polish with a chambray. Mixing the silver powder with alcohol instead of water will give a more brilliant luster with less work.

## TO HELP MILADY IN SUMMER DRESSING.

Real Irish lace in the narrow insertions and narrow edges still remains a favorite in the realm of lingerie. The lace is often made by combining it with Valenciennes and Valenciennes and Cluny are much used in the Irish.

The type of dot most successful last season, a wide, closely spaced dot and leaving only a very little of the background showing, is here again in lovely colors, and in a variety of design, but with the white and color reversed.

The vogue of black and white extends to chic little trotting frocks of moderate size and loose fitting, chiffon, etc., trimmed in black silk and with coats of black silk.

## Carry Back of Head.

Carry your parol back of your head rather than above it. A parol held directly over the top of the head gives the face a downward slant.

Be careful and do not have the handle too long. The extremely long handles are more for walking than for carrying.

Get a parol with a bloomy look. If there are ruffles, so much the better. Keep within the fashion, of course, but be sure that there is something that shows softly around the face, for the face needs something softening, no matter how pretty it may be.

Don't carry a dark parol. The lighter the shade the better. Nobody ever saw a black sunshade that was actually becoming to the face. No body ever saw a woman look pretty under a black silk umbrella outside the pages of a popular seller.

Another thing, a parol has a tendency to make a person look a trifle taller. The short woman can carry one of moderate size and style in stature, but the extremely tall woman must approach the subject with caution.

## Preserving Hint.

After emptying a glass jar of fruit or jelly wash it thoroughly, and fill with sugar. Keep in a dry place when ready to preserve or make jelly. The jar need only be washed with water when ready to use.

## Table Linen.

The cheapest table linen may be made to look as smart as beautiful as the most expensive by ironing in this manner. After the linen has been carefully washed and rinsed, carefully and then roll up in a clean, dry sheet and leave for one hour. Iron until thoroughly dry. The linen will escape the wear and tear of swinging on the line and will not get out of shape as when dried in the usual way.

## Autograph Cook Book.

An autograph cook book is quite a new and really desirable one. Any scribbler and blank book will do. It should contain the favorite recipes of your friends and will not only be a valuable household help.

## Uses for Paper Bags.

Save all sizes of paper bags for fruit canning time, and when the fruit is ready to put away, slip the jar in a bag. Tie the top securely and write on the bag the name of contents. There is no fear of fruit spoiling and the jars are free from rust, no matter how long they are kept.

## For Rainy Days.

A good way to keep your skirt from getting dirty and wet on rainy days is to put a piece of black elastic with hook and eye at ends around the hips over your skirt. Pull up the skirt on all sides, put on your coat and no one will notice it. The skirt will stay up and relieve you of holding and crushing it.

## For the Mattress.

When cleaning house get a quarter of a yard of strong ticking, cut and sew into a double row of narrow strips for handles. You will find it a great help in lifting and turning the mattress.

## Keys.

Try tying keys to door knobs with a loop of narrow ribbon. It will save a

season. Repeat until dish is filled. Cover top with buttered crumbs and bake until brown.

**To Clean Enamel Tub.**  
Moisten a cupful of table salt with turpentine. Use this to scour the tub, then rub with a clean cloth. Before cleaning operations have the tub free from all moisture.

**An Economical Pudding.**  
Heat to the boiling point a quart of milk. Add a generous half cup of oat flakes, sugar to sweeten and a half cupful of raisins. Flavor to taste, cook ten minutes, put in the cooker and cook eight hours. Serve either hot or cold.

**One-Egg Cake.**  
Cup of sugar, one-third putmeg, grated; add one-half teaspoon of salt, one mixing spoon of drippings or butter; beat together; break in one egg; mix thoroughly. Add three-quarters cup of cold water, one and three-quarters cups of flour in which have been sifted a half teaspoon of soda and one teaspoon of cream of tartar; beat all together for several minutes; bake about 25 minutes in moderate oven in a sheet tin.

This is a light, wholesome cake. Heat butter the size of half a walnut in bowl, add cup of confectioner's sugar, one-quarter teaspoon of vanilla and just milk enough (cream is better) to make a paste; spread on cake. Teaspoon of cocoa makes delicious chocolate frosting.

**To Make Tender Roast.**  
To keep roasts from burning and make them tender and palatable place

a small pan of vinegar in the oven. This applies to all roasts.
